Emerson Stewart is an Australian results orientated; environmental, engineering, project delivery and specialist consulting services across the infrastructure, resources and energy sectors.

Manager/ Principal Consultant, Environment & Water

Due to strategic growth we are seeking to appoint a Manager, Environment & Water into our successful Perth based business.

The primary objective of this role is to bring currently outsourced environmental services, "in house", by building a team that is capable of providing quality solutions to clients in all areas of environmental services such as approvals and planning, water and waste water treatment, hydrogeology, environmental engineering services, environmental geology and aquatic services.

The role will also be responsible for the development, implementation, monitoring and evaluation of environmental policies & strategies to ensure the continued delivery of exceptional technical and commercial solutions to our clients.

The ideal candidate will be a highly driven individual that holds a strong professional network in the industry and have a proven track record of operating at a managerial level with the ability to lead a multi disciplined team whilst displaying excellent commercial acumen.

The candidate will also have tertiary qualifications in related disciplines, with postgraduate qualifications being highly regarded and a minimum of 15yrs experience in professional service organisations.

An attractive remuneration package will be offered. Please forward your Resume attention to Manager Team+ at careers@emersonstewart.com All applications will be treated 'in confidence' to protect the privacy of candidates.
